

PCB ASSEMBLY

(OUR SERVICES)

SONNENBURG ELECTRONIC is your reliable partner for device construction and assembly. We offer you excellent quality and superb value for money. Our specialised and experienced staff accompany you from the prototype creation to the finished series.

For your electronic products we offer a professional SMD (Surface Mount Devices) and THT (Through hole Technology) assembly. We mount small series as well as high volume and develop the best technical solutions according to your needs and requirements. State-of-the-art technology coupled with a flexible, specialised workforce guarantees you high quality, reduced production times and therefore low costs. You can trust us, the specialist for Printed Circuit Board assembly.

WE OFFER

- SMD and THT PCB assembly - from the prototype to small and mass series
- purchasing of soldering paste stencils, PCBs and other components
- ESD compliant machining
- manufacture according to ISO 14001:2009, ISO 9001:2008 as well as e1 approval of the German Kraftfahrt-Bundesamt
- for the production, professional, certified and high quality soldering pastes, adhesives and flux material are used only
- ERP system supported production
- we ensure high safety standard with the aid of modern production lines
- packing and delivery according to customer requests

YOUR ADVANTAGE

- no labour or cost intensive investments into an own production line
- short delivery times, if requested within 24 h
- optionally taking charge of delivery logistics
- high flexibility
- prime quality
- excellent price performance ratio
