

SELECTIVE COATING (OUR SERVICES)

SONNENBURG ELECTRONIC is your reliable partner for device construction and assembly. We offer you excellent quality and superb value for money. Our specialised and experienced staff accompany you from the prototype creation to the finished series.

We utilise fully automatic selective coating machinery from Nordson Asymtek and guarantee you faultless processes. The coating is made with fixed defined and constant remaining parameters. It is made selectively with highest precision. Therefore, a lamination of plug-and-socket connections, contact surfaces or other components are not necessary. In addition, we guarantee you a spray-free application of the coat.

WE OFFER

- coating of prototypes and small series
- faultless processes
- state-of-the-art technology
- excellent know how

YOUR ADVANTAGE

- no labour or cost intensive investments into an own production line
- short delivery times, if requested within 24 h
- optionally taking charge of delivery logistics
- high flexibility
- prime quality
- excellent price performance ratio
